**I. Introduction**

The Montana Board of Crime Control (MBCC) is soliciting proposals for youth-oriented substance abuse and violence prevention to be funded by the Federal Safe and Drug Free Schools and Communities Act (SDFSCA). Approximately \$300,000 will be available during fiscal year 2007-2008. Of the available funding 40% will be used towards funding Rural School Resources Officers implementing a best practice prevention program.

Safe and Drug Free Schools and Communities grants require an incremental cash or in-kind match. The requirements are addressed in the Match section of this RFP. Tribal governments are not exempt from the match requirement.

The total eligibility period is 12 months depending on availability of federal funds (possible continuation for an additional 36 months depending on availability of federal funds). Applications for continuation funding must be submitted annually (**Note: Because federal funds are not always available immediately following the award date programs should prepare for this contingency.**). SDFSCA subgrantee continuation programs in good standing will be given first priority for funding, however, funding is considered on a year-to-year basis and **is not guaranteed.**

**II. Purpose of Grant**

The purpose of the funding is to provide communities with funding **to implement scientifically based researched youth-oriented drug and violence prevention programs** (Promising, Best or Exemplary Programs) that are guided by the principles generally described as the Risk and Protective Factors approach to the field of prevention. Projects should demonstrate a linkage to their local education agencies.

## **CLOSED – This Request for Proposal is for reference purposes only.**

Additionally, in keeping with the guidelines from the U.S. Department of Education and the Montana Office of Public Instruction, programs must follow the **Principles of Effectiveness** in their planning and implementation of project.

### **Principles of Effectiveness**

1. Base programs on a thorough assessment of objective data about drug and violence problems in the schools and communities to be served. Current Prevention Needs Assessment Survey 2006 and/or Montana Youth Risk Behavior Survey 2005, and/or additional data collected through school database.
2. Based on an established set of performance measures. Program design to meet goal and objectives (one goal and no more than three objectives). Ensuring the communities to be served by the program has a safe, orderly, and drug-free learning environment.
3. Basing it on scientifically based research that provides objective evidence that the program will reduce violence and illegal drug use. **Must indicate in the application in Program Narrative identifying if the program is deemed Promising, Best or Exemplary Program.**
4. Be based on an analysis of data reasonably available at the time, of the prevalence of risk factors, including high or increasing rates of reported cases of child abuse and domestic violence; protective factors, buffers, assets; or other variables in school and communities in the local area identified through scientifically based research. See application package. The most current Montana Prevention Needs Assessment (2006) or Montana Youth Risk Behavior Survey (2005) can be used for your area.
5. Include meaningful and ongoing consultation with and input from parents in the development of the application and administration of the program or activity.
6. The program undergo periodic evaluation to assess its progress towards its performance measures indicated in the application related to identified risk factors and protective factors.
7. Use the evaluation results to refine, improve, and strengthen both the program and its evaluation design, and to inform the public.
